About This Game

Echoes in White - a Relaxation Music Experience

Escape the "Mental Hamster Wheel" and leave behind everyday stress. Dive into the fantastic visual worlds of Space and the Green Oasis combined with magic binaural music.

Enter the Spaceship menu. Choose your music style: from classic, ambient up to electronic mixes. Enjoy stunning Space Worlds, a beautiful Green Oasis and a surreal White World. The "Chrystal Dancer" leads you back to Space. With your Controller you can select the different audio mixes.

Inside the Spaceship you have more options: Relax inside the interactive Fantasy Shapes and Rays of Light. You can completely let go mentally while you are creating stars, suns, bubbles or leaves combined with electronic and world ethno music. Watch the bonus video, enjoy the binaural Audio Dome.

This experience is meant especially for relaxation - enjoy a peaceful world without the need of much interaction.

Echoes in White - wellness for your soul, designed by international artists!

Want to start the game? Yes, you can

Want to shoot some animals? Pay us and you can

Want a new weapon? Pay us and you will have one

Want to do anything? Pay us a lot and you can do everything. My favourite horror game, can't wait for the sequel on Halloween.

Also this is one of the horror games that really scare me. John Kolbek and Nathan Sanders did a really good job on this. I definatly recommend this.. Underpriced. Game is totally worth more, I hope they make it resemble the Konami Gladiator game.. One of the best current Vive games. The game starts off a little weak but I have to say after about 20 minutes I found myself enjoying it. It's a horror walking simulator with some light puzzles and multiple endings that actually does manage to build up some atmosphere.

Some gameplay:

<https://www.youtube.com/watch?v=MFQufuDcx4E>. it is so bad

!!!!!!!!!!!!!!!!!!!!

I bought it because of Square Enix. They cannot make or produce bad games right? Well.. this one is not their best ones. Story is probably good but swap four to form somewhat combos is somewhat a tricky thing. I personally am no fan of these rotate/twist four puzzle games and I lost my interest on it entirely quite soon, so I cannot recommend it to anyone who's not fan of the type of puzzle games.. A lot of fun. Hmm Happy Room WHAT A MURDEROUS SCENARIO!!!. *Good game for those looking a more unique racing experience and not bothered by primitive 3D graphics.*

Slipstream 5000 is a futuristic flight and combat racing game by Gremlin Interactive.

This game is a child of the 90s, from times when future was not all apocalypse and racing games dared to have other vehicles than automobiles.

The sounds of the planes, the craft and course design, radio chatter between competitors and the pre-race TV hosts introducing the upcoming track are few of the highlights which really make this futuristic world believable.

The game is challenging and the controls are really tight PROVIDED you're using a joystick or even analog gamepad. This game NEEDS analog controls. Period.

One negative is the low in-game resolution which makes it hard to judge turns at distance and you to rely on track memorization. While the graphics are mostly OK and at times quite good for a 3D DOS game, there is no option to increase resolution past 320x200. Play it in 14" CRT telly and it'll be much better.

It would be nice for DosBox to exit itself though. Not a dealbreaker but some people might find this confusing when quitting the game.. [https://youtu.be/ PcwZf_RLIQ](https://youtu.be/PcwZf_RLIQ)

Fly through the air with the greatest of ease bouncing from balloon to balloon to reach the end goal. Popping all the balloons and collecting numerous coins around the level award completionist medals at the end.

A simple concept that is delivered well is what makes POPixel worth checking out. Each stage will challenge the player's dexterity to make the jump and mentally to puzzle out the paths to pop and collect everything along the way.
